Hi Ben

We're much happier now that it has been demonstrated that the refuse vehicle can access the property adequately, and the removal of the parking space should remove the final concerns regarding access.

This hasn't answered the query raised regarding recycling. However, if the services of a private licensed waste carrier are to be utilised who will sort the refuse and recycling off-site, or recycling facilities/containers are taken to be provided, this will suffice.

We are largely satisfied with the arrangements.

Please pass our thanks to the agents for supplying information this swiftly.

Kind regards

Matthew Sharp
